

SNOWBALL — Master Platform Blueprint

The Luxury Design Site Intelligence Platform

Curated & Architected by Captain | Version 1.0

> "Snowball — because great design compounds. Every site we build, every client we win, every trend we absorb makes the next one better, faster, and worth more."

00. NAME DECISION — SNOWBALL

Primary Name: Snowball Design Intelligence

Why Snowball Works:

- Communicates the compound growth model (every site makes the platform smarter)
- Contrasts with the cold, minimal luxury aesthetic — unexpected and memorable
- Last name as brand = personal equity baked in from day one
- Short, punchy, domain-friendly, globally pronounceable
- Subtle power connotation — unstoppable once in motion

Name Variants to Test:

| Variant | Tone | Use Case |

|-----|-----|-----|

| Snowball | Friendly + powerful | Consumer-facing, agency clients |

| Snowball Studio | Creative agency feel | Design-forward clients |

| Snowball Design Intelligence | Enterprise / SaaS | Platform/tool positioning |
| SNWBL | Abbreviated mark | Logo, favicon, app icon |

Domain Targets:

snowball.design (IDEAL)
snowballstudio.io
snwbl.io
getsnowball.design

Test Criteria: Run 3 client conversations. If they remember the name after 48 hours = keep it.
If confusion with finance/investing connotations = pivot to Snowball Studio or SNWBL.

01. THE 8 REFERENCE BRANDS — FULL DESIGN DNA AUDIT

What We Extracted From Each Brand

1. MARCELLO DESIGN X

Signature: Dark precision luxury. High contrast. Technical elegance.

Layout Language: Full-bleed dark backgrounds, precise grid, minimal copy, large project imagery.

Typography: Geometric sans-serif, tight letter-spacing, mixed weight hierarchy.

Color Palette: Near-black (#0A0A0A), warm white (#F5F2EE), single metallic accent (gold or chrome).

Motion Language: Slow, deliberate transitions. Nothing bounces. Everything slides or fades with intent.

Navigation: Minimal top bar, hamburger on mobile, no clutter.

What We Extract: The darkness. The precision. The feeling that everything costs money.

2. PININFARINA

Signature: 90+ years of Italian elegance. Curves over angles. Heritage + future.

Layout Language: Wide whitespace, editorial grid, sectors clearly organized, strong photography.

Typography: Mixed serif/sans — tradition meeting modernity. Clean hierarchy.

Color Palette: White dominant, black accents, occasional red or silver.

Navigation Structure: Multi-sector nav (Automotive / Architecture / Nautical / Product / Mobility).

Key Sections: About > Heritage > Sectors > Services > Approach > Contacts.

Motion Language: Smooth, unhurried. The site breathes.

What We Extract: The sector-based content architecture. The heritage storytelling. The contact form elegance.

3. ITALDESIGN GIUGIARO

Signature: Technical + sculptural. Engineering meets art.

Layout Language: Grid-heavy, project-portfolio-forward, multiple language support.

Typography: Technical sans-serif, strong weight contrast.

Color Palette: White, grey, black. Industrial restraint.

Motion Language: Functional. Not decorative.

What We Extract: The technical credibility signals. The portfolio grid system.

4. ZAGATO

Signature: Avant-garde atelier. Milan-coded. Cars as wearable art.

Layout Language: Atelier framing — "ATELIER / STUDIO / ARCHIVIO" as nav anchors.

Typography: Uppercase editorial, aggressive spacing, Italian aesthetic confidence.

Color Palette: Black, white, occasional deep red. Zero compromise.

Key Sections: Atelier, Contemporary, Classic, Studio, Archive, Brands, Decades.

Motion Language: Bold cuts. No apology.

What We Extract: The atelier framing — positioning design as couture, not service. The archive as equity.

5. BERTONE

Signature: Wedge futurism. The 1970s future that never died.

Layout Language: Archival + contemporary split. History as brand currency.

Typography: Bold, unapologetic. Wide tracking on display text.

Color Palette: High contrast. Often black + single vivid accent.

What We Extract: The historical depth as competitive moat. Legacy = trust signal.

6. PRIESTMANGOODE

Signature: Transport luxury + human-centered design. Clean, authoritative.

Layout Language: White-dominant, strong photography, client testimonials prominently featured.

Typography: Clean sans-serif, excellent readability, editorial hierarchy.

Key Sections: Strategy + Innovation / Interior + Spatial / Branding + Graphics / Digital / Industrial / Transport.

Social Proof: CEO testimonials from Riyadh Air, Via Rail Canada, United Airlines — enterprise-grade.

What We Extract: The testimonial architecture. The sector-service matrix. The "transformative design" positioning language.

7. SEYMOURPOWELL

Signature: 40 years of strategic design. Future-forward, data-informed.

Layout Language: Bold hero typography ("We believe great design is about making things better"), stat blocks (40 years / 986 clients / 7896 projects), award history.

Typography: Large, confident hero type. Clear editorial hierarchy.

Key Sections: Expertise / Work / Culture / Contact.

Social Proof: 116 awards, 40 years, 986 clients — quantified credibility.

What We Extract: The quantified authority blocks. The "beliefs" positioning. The award count as trust signal.

8. WEARBRAND.IO

Signature: Brand identity meets product design meets digital. Bridge between physical and digital luxury.

Layout Language: Clean, modern, startup-adjacent but premium.

Color Palette: White + black + brand accent. Versatile.

What We Extract: The brand kit concept. The digital-physical bridge. The accessibility of premium (smaller firm = approachable luxury).

Why It Matters For Snowball: It's the proof that you don't need 90 years of heritage to play in this space.

02. THE SNOWBALL DESIGN SYSTEM — CURATED STACK

Typography System (3 Tiers)

Tier 1 — Prestige Display (Headlines, Hero Text)

Primary: PP Neue Montreal or Neue Haas Grotesk Display
Alternative (free): Inter Display or DM Sans at heavy weight
Characteristics: Geometric, tight tracking, authority without arrogance
Usage: H1, H2, hero text, section titles

Tier 2 — Editorial Body (Content, Descriptions)

Primary: Freight Display Pro (serif for contrast) or Editorial New
Alternative (free): Playfair Display or Cormorant Garamond
Characteristics: Elegant, readable, signals craft
Usage: Project descriptions, about text, long-form content

Tier 3 — Technical Caption (Labels, Nav, Meta)

Primary: Space Mono or JetBrains Mono
Characteristics: Technical precision, monospaced = engineering credibility
Usage: Project codes, dates, sector labels, nav items

Color System — 5 Palette Archetypes

Archetype A: Dark Precision (Marcello DNA)

Background: #08090A
Surface: #111318
Text Primary: #F0EDE8
Text Secondary: #9A9A9A
Accent: #C9A96E (warm gold)
Border: #2A2A2A

Archetype B: Italian Elegance (Pininfarina DNA)

Background: #FAFAF8
Surface: #F2F0EB
Text Primary: #111111
Text Secondary: #666666
Accent: #CC2929 (Italian red)
Border: #E0DDDA

Archetype C: Industrial Steel (Zagato/Bertone DNA)

Background: #0F0F0F
Surface: #1A1A1A
Text Primary: #FFFFFF
Text Secondary: #888888
Accent: #E8E8E8 (chrome white)
Border: #333333

Archetype D: Transport Clean (PriestmanGoode DNA)

Background: #FFFFFF
Surface: #F7F7F7
Text Primary: #1A1A1A
Text Secondary: #555555
Accent: #003087 (aviation navy)
Border: #EBEBEB

Archetype E: Brand Studio (Wearbrand DNA)

Background: #FEFEFE
Surface: #F4F4F4
Text Primary: #0A0A0A
Text Secondary: #777777
Accent: #FF4A1C (energetic orange)
Border: #E5E5E5

Spacing & Grid System

Base Unit: 8px

Grid: 12-column, 24px gutter, 80px outer margin (desktop)

Breakpoints: 1440px / 1280px / 1024px / 768px / 375px

Section Rhythm:

Hero: Full viewport (100vh)
Intro sections: 160px top/bottom padding
Project grid: 120px top/bottom padding
Testimonials: 140px top/bottom padding
Contact: 160px top/bottom padding

03. THE SNOWBALL TECH STACK — CURATED (NO VIBE CODING)

Frontend Stack

| Layer | Technology | Why |

|-----|-----|-----|

| Framework | Next.js 14 (App Router) | SSR + SSG hybrid, perfect for SEO-rich design studio sites |

| Styling | Tailwind CSS + CSS Variables | Rapid theming, archetype switching via CSS vars |

| Animation | Framer Motion | The gold standard for luxury-grade scroll + transition effects |

| 3D/WebGL | Three.js or Spline | For hero sections that need depth and motion (automotive feel) |

| CMS | Sanity.io | Structured content, real-time previews, client-editable |

| Image Handling | next/image + Cloudinary | Auto-optimization, luxury-grade image delivery |

| Font Loading | next/font | Zero layout shift, self-hosted for performance |

| Icons | Phosphor Icons or Lucide | Clean, consistent, scalable |

Backend Stack

| Layer | Technology | Why |

|-----|-----|-----|

| API Layer | Next.js API Routes + tRPC | Type-safe, fast, co-located with frontend |

| Database | Supabase (PostgreSQL) | Open source, scalable, real-time, auth built in |

| Auth | Supabase Auth + NextAuth | Social login + email, enterprise SSO ready |

| Storage | Supabase Storage + Cloudinary | Assets, client uploads, project images |

| Email | Resend + React Email | Beautiful transactional emails, developer-first |

| Payments | Stripe | Industry standard, handles subscriptions + one-time |

| Hosting | Vercel | Zero-config deploys, edge network, perfect for Next.js |

| CDN | Vercel Edge Network + Cloudflare | Global performance for image-heavy luxury sites |

AI / Intelligence Layer

| Function | Technology | Why |

|-----|-----|-----|

| Style Advisor | OpenAI GPT-4o + custom fine-tune | Flags design decisions that break luxury grammar |

| Trend Scraper | Firecrawl + custom pipeline | Monitors Awwwards, Red Dot, iF, Dezeen weekly |

| Brand Input Processing | GPT-4o Vision | Reads client logos + extracts colors/style signals |

| Copy Generation | GPT-4o | Luxury-grade copy that sounds like a \$500/hr copywriter |

| Image Generation | Midjourney API or Flux | Project mockups, hero images, portfolio placeholders |

| Competitor Analysis | Firecrawl + embeddings | Monitors competitor site changes, surface opportunities |

The Design Intelligence Database

This is Snowball's core moat — a curated database of:

...

design_dna/

|— archetypes/ # 8 base archetypes (Marcello, Pininfarina, etc.)

|— components/ # 200+ pre-styled components per archetype

|— typography_pairs/ # 40 curated font combinations

|— color_palettes/ # 120 validated luxury palettes

|— motion_patterns/ # 30 animation recipes

|— layout_grids/ # 15 proven layout systems

|— copy_templates/ # 500+ luxury copy fragments
|— trend_signals/ # Weekly scraped & curated trend data
...

Everything is version-controlled and tagged:

Industry (Automotive / Aviation / Nautical / Architecture / Jewelry / Industrial)
Era (Heritage / Contemporary / Future-Forward)
Price Signal (Premium / Ultra-Luxury / Bespoke)
Mood (Dark Precision / Light Elegance / Technical / Organic)

04. THE COMPONENT LIBRARY — 200+ BLOCKS

Every site needs these 12 core sections. Here's the full spec:

SECTION 1: HERO

Variants: 4 per archetype = 32 total hero variants

Variant	Description	Best For
-----	-----	-----
Full-Bleed Dark	Dark BG, large display text, single CTA	Marcello / Zagato style
Cinematic Video	Looping reel behind minimal text	Automotive, Aviation
Split Screen	50/50 image + text	PriestmanGoode style
Editorial Type	Typography-only, no image	Brand studios, Seymourpowell style

Required Elements:

Navigation bar (logo left, links center/right, CTA button)
Primary headline (display font, 80-120px desktop)
Subheadline (body font, 20-24px)
Single CTA button ("View Work" / "Start a Project")

Scroll indicator (subtle arrow or line)

SECTION 2: ABOUT / PHILOSOPHY STATEMENT

Purpose: Establish worldview in 3-4 sentences. No fluff.

Template Copy Structure:

[FIRM NAME] [core belief statement].

We [what we do differently] for [client type].

[Heritage or approach differentiator].

[Call to action or invitation].

Example (Pininfarina-inspired):

"We design the things that define an era.

Our work spans continents, industries, and decades —
united by a single obsession: the pursuit of timeless form.

If you build things that matter, we should talk."

SECTION 3: SECTOR / SERVICE GRID

Layout: 3-column or 2-column card grid

Each Card Contains:

- Sector icon (line art, 40x40px)
- Sector name (caps, tracked)
- 2-line description
- Arrow link

Standard Sectors (customize per client):

Automotive / Architecture / Nautical / Product / Aviation / Jewelry / Industrial / Digital

SECTION 4: FEATURED PROJECTS

Layout: Asymmetric grid (large hero project + 2-3 secondary)

Each Project Card:

- Full-bleed image
- Project name (on hover or always visible)
- Client name (optional — some clients prefer anonymity)
- Year
- Category tags
- View Project arrow

Hover State: Image zooms 5%, overlay fades in with project info

SECTION 5: STATS / AUTHORITY BLOCK

Inspired by Seymourpowell's "40 Years / 986 Clients / 7896 Projects"

Layout: 3-4 stat blocks, horizontal row

| Stat Type | Example | Visual |

|-----|-----|-----|

| Years of experience | 12 Years | Large number + label |

| Projects completed | 340+ Projects | Large number + label |

| Countries | 18 Countries | Large number + label |

| Awards | 24 Awards | Large number + label |

SECTION 6: CLIENT LOGO BAR

Layout: Scrolling horizontal marquee (infinite loop)

Styling: Logos desaturated to grey, hover = full color

Note: Even 3-4 logos dramatically increase perceived credibility

SECTION 7: TESTIMONIAL / SOCIAL PROOF

Inspired by PriestmanGoode's CEO quote blocks

Layout: Large pull quote, attribution, optional photo

Template:

'''

"[Specific outcome or feeling, not generic praise].

[What made the firm different from alternatives]."

— [FULL NAME], [TITLE], [COMPANY]

'''

SECTION 8: PROCESS / APPROACH

Layout: Numbered steps (4-6 steps), horizontal or vertical

Steps Template:

1. Discovery — Understanding your world
2. Strategy — Defining the design direction
3. Development — Building with precision
4. Refinement — Until it's exactly right
5. Delivery — Launch-ready, future-proof

SECTION 9: AWARDS & RECOGNITION

Layout: Grid of award logos / badges

Supported Awards: Red Dot, iF Design, Awwwards, D&AD, Core77, Fast Company Innovation

SECTION 10: TEAM

Layout: Grid of portraits with name + role

Styling: B&W portraits, color on hover

Optional: Brief philosophy quote per team member

SECTION 11: NEWS / JOURNAL

Layout: Editorial 3-column grid

Each Entry: Category tag + headline + date + read time

Purpose: SEO + thought leadership signal

SECTION 12: CONTACT

Layout: Split — left side brand statement, right side form

Form Fields: Name / Company / Email / Project Type / Budget Range / Message

After Submit: Immediate confirmation + expected response time

Trust Signals: Response time promise ("We respond within 24 hours")

05. THE SITE BUILDER FLOW — HOW IT WORKS

Client-Facing Journey (5 Steps)

...

STEP 1: NICHE SELECTOR

"What kind of design firm are you?"

→ Automotive / Aviation / Architecture / Nautical /
Jewelry / Industrial / Product / Brand Studio

STEP 2: ARCHETYPE SELECTOR

"Choose your aesthetic direction"

→ Show 8 style cards (one per reference brand)
→ Client picks 1 primary + 1 secondary influence

STEP 3: BRAND INPUT

"Tell us about your firm"

→ Upload logo
→ Company name + tagline
→ Founded year
→ Team size
→ Top 3 clients (optional)
→ Upload 5-10 project images

STEP 4: COPY INPUT

"What do you want to say?"

→ About statement (or AI generates from inputs)
→ Services list
→ Contact preferences

STEP 5: PREVIEW + PUBLISH

→ Live preview renders in ~30 seconds
→ Client can toggle between archetype variants
→ Request changes via annotation tool
→ Approve → Publish to custom domain

...

06. THE AI STYLE ADVISOR — HOW IT WORKS

The Style Advisor is Snowball's secret weapon. It's an AI layer that:

Catches Luxury Grammar Violations:

- Wrong font pairing (e.g., Lobster + Helvetica on a luxury site = flagged)
- Low contrast (luxury sites have specific contrast ratios)
- Too many colors (luxury = restraint; 3 colors max)
- Wrong imagery (stock photo watermarks, generic office photos)
- Copy that doesn't match the archetype tone
- Missing trust signals (no awards, no client names, no year founded)

How It Flags Issues:

- Real-time inline suggestions (like Grammarly, but for design)
- "Luxury Score" — 0-100 rating per section
- Specific fix suggestions ("This font doesn't match your archetype — try PP Neue Montreal")

What It Approves:

- Gives green checkmarks when sections hit luxury standards
- "Ready to Publish" gate — site must hit 80+ Luxury Score before going live

07. THE LEARNING SYSTEM — THE MOAT

How Snowball Gets Smarter Every Week

Data Sources:

1. Awwwards — Top 10 sites of the week (scraped Mon 6am)
2. Red Dot Award — New winners (scraped on announcement)

3. iF Design Award — Annual winner database
4. Dezeen — Architecture + product design trends
5. Wallpaper* — Luxury product + brand launches
6. Core77 — Industrial design community
7. Are.na — Designer taste-making platform

Weekly Curation Pipeline:

Scrape → Extract visual signals → Compare to existing DNA database

→ Flag new patterns → Human review (you or AI curator)

→ Approve → Add to template library → Auto-update existing sites

Client Feedback Loop:

Track which template sections clients modify most

Track which color archetypes get chosen most by niche

Track time-on-page for different hero variants

Monthly report: "Design Intelligence Update" sent to SaaS subscribers

08. MONETIZATION STACK — FULL PRICING ARCHITECTURE

Product Tiers (3 Core Offers)

TIER 1: DONE-FOR-YOU (DFY) SITES

Who buys this: Independent design studios, boutique firms, consultants.

What they get: You build it. They own it. Full luxury experience.

| Package | Price | Includes | Timeline |

|-----|-----|-----|-----|

| Snowball Starter | \$2,500 | 1 archetype, 6 sections, 1 revision round | 5 business days |

| Snowball Studio | \$4,500 | 1 archetype, 12 sections, 3 revision rounds, CMS setup | 10 business days |

| Snowball Bespoke | \$8,500 | Custom archetype blend, full 12 sections, unlimited revisions, 3-month support | 15 business days |

Annual Revenue Potential (solo):

2 Starter + 2 Studio per month = \$14,000/mo = \$168,000/yr

Add 1 Bespoke/mo = \$22,500/mo = \$270,000/yr

TIER 2: SELF-SERVE TEMPLATES

Who buys this: Designers who want to use the system themselves.

What they get: Download or access the template, build it themselves.

| Product | Price | Includes |

|-----|-----|-----|

| Single Template License | \$497 | 1 archetype, Figma + code files, 1 year updates |

| Full Library License | \$1,997 | All 8 archetypes, Figma + code files, 1 year updates |

| Agency License | \$4,997 | All 8 archetypes, client resell rights, white-label, 1 year updates |

TIER 3: SAAS PLATFORM (THE COMPOUNDER)

Who buys this: Design agencies, freelancers, marketing teams who need ongoing luxury site output.

Plan	Price	Includes
-----	-----	-----
Studio	\$149/mo	1 active site, all archetypes, AI Style Advisor, basic analytics
Agency	\$299/mo	5 active sites, white-label, priority support, trend reports
Enterprise	\$999/mo	Unlimited sites, custom archetype training, API access, dedicated account manager

SaaS Revenue Projections:

50 Studio subscribers = \$7,450/mo
 20 Agency subscribers = \$5,980/mo
 5 Enterprise = \$4,995/mo
Total at these numbers: \$18,425/mo = \$221,100/yr recurring

TIER 4: UPSELL / ADD-ON PRODUCTS

Add-On	Price	Description
-----	-----	-----
Brand Kit	\$499	Logo variations, color system, typography guide PDF
Copywriting Package	\$799	Full site copy written in luxury tone by AI + human review
SEO Setup	\$599	Technical SEO, meta, structured data, Google Search Console
Monthly Maintenance	\$199/mo	Updates, security, content edits, performance monitoring
Photography Direction	\$399	Shot list + art direction guide for client's photographer

Combined Revenue Target (12-Month)

Stream	Conservative	Aggressive
-----	-----	-----
DFY Sites	\$84,000	\$216,000

Template Licenses	\$24,000	\$60,000
SaaS Subscriptions	\$72,000	\$180,000
Add-Ons	\$18,000	\$48,000
TOTAL	**\$198,000**	**\$504,000**

09. GO-TO-MARKET STRATEGY

Phase 1: Manual Validation (Month 1-2)

Goal: Close first \$15K in revenue before building anything.

Target Clients:

1. Independent automotive designers (freelancers who have outgrown portfolio sites)
2. Industrial design consultancies (1-5 person firms)
3. Luxury product startups needing brand credibility fast
4. Architecture firms without a strong web presence
5. Design-adjacent firms (engineering studios, innovation consultancies)

Where To Find Them:

LinkedIn: Search "Design Director" + "Independent" + [niche]
Dribbble / Behance: DM designers with outdated portfolio sites
Awwwards "Made With Love" credits — find the studios behind great work
Design conferences: Core77 Conference, Red Dot Gala, Milan Design Week
Instagram: Follow #industrialdesign #automotivedesign — DM studios with weak sites

Outreach Script (LinkedIn/Email):

Subject: Your work deserves a better stage.

Hey [Name],

I've been following [Firm Name]'s work — particularly [specific project].

The quality of what you're designing is genuinely exceptional.

Your website isn't keeping up.

I build luxury design agency sites specifically for firms like yours —
modeled on the design language of Pininfarina, Zagato, and Marcello Design X.

I have one slot available this month at \$4,500.

Can I send you a concept mockup? Takes 10 minutes to put together.

— [Your Name], Snowball Design Intelligence

...

Week 1-2 Actions:

- ☐ Build Demo Site #1 (Marcello dark archetype)
- ☐ Build Demo Site #2 (Pininfarina light archetype)
- ☐ Set up snowball.design domain + landing page
- ☐ Send 50 outreach messages
- ☐ Close first client

Phase 2: Template System (Month 2-4)

Goal: Turn the first 3 DFY builds into reusable templates.

Actions:

- ☐ Codify each completed site into a component library
- ☐ Build Figma master template for each archetype
- ☐ Build Next.js starter template for each archetype
- ☐ Launch Gumroad or Lemon Squeezy storefront for template sales
- ☐ Price single template at \$497, start with 2 archetypes

Phase 3: Platform Alpha (Month 4-6)

Goal: First 10 paying SaaS subscribers.

Actions:

- [] Build the site builder UI (Next.js + Sanity)
- [] Implement 3 archetypes in the builder
- [] Add basic AI Style Advisor (GPT-4o integration)
- [] Launch closed beta: invite first 20 clients from DFY work
- [] Price alpha at \$99/mo (discounted for early adopters)

Phase 4: Full Launch (Month 6+)

Goal: \$20K MRR

Actions:

- [] Launch all 8 archetypes in the platform
- [] Full AI Style Advisor with Luxury Score
- [] Weekly trend digest for subscribers
- [] ProductHunt launch
- [] Outreach to design agencies for white-label licensing

10. SALES PLAYBOOK — CLOSING \$5K SITES

The 3-Step Close

Step 1: The Concept Hook (Day 0)

Send them a 60-second Loom video showing their current site alongside one of your Snowball demos.

Don't pitch. Just say: "I made this in 20 minutes. Wanted to show you what's possible."

Step 2: The Discovery Call (Day 2-3)

30-minute call. Ask:

"What kind of clients are you trying to attract?"

"What do your best clients say about you?"

"What's the ONE thing your site should make someone feel?"

"When do you want this done?"

Step 3: The Proposal (Day 3-4)

Send a 1-page proposal. Include:

2 archetype options (Dark Precision vs Light Elegance)

Clear deliverables list

Timeline

Price (one number, no options — options kill deals)

"50% deposit to start, 50% on delivery"

Objection Handling:

| Objection | Response |

|-----|-----|

| "It's too expensive" | "What does one new client worth to you? This site will close more than one." |

| "I can do it myself" | "You could. But you're spending your time designing, not building websites." |

| "I need to think about it" | "Totally fair. I have one slot in [month]. Want me to hold it?" |

| "Can you do it cheaper?" | "I can't do this quality for less. But I can do a smaller scope at \$2,500." |

11. COMPETITIVE MOAT — WHY SNOWBALL WINS

The 5 Layers of Defense

Layer 1: Niche Specificity

Webflow, Squarespace, and Framer serve everyone.

Snowball serves luxury design firms ONLY.

This means better results, better word-of-mouth, higher prices.

Layer 2: Design DNA Database

The 8 reference archetypes + 200+ components + 120 color palettes cannot be replicated overnight.

Every site we build adds to the database.

Every trend we scrape sharpens the AI.

Layer 3: The Luxury Score

No other platform tells you when your site looks cheap.

This becomes a trust signal clients will pay for.

Layer 4: Category Authority

Snowball will become THE name for luxury design agency sites.

First-mover advantage in a niche no one has targeted properly.

Layer 5: Compounding Intelligence

The learning system means Snowball is always current.

Competitors have static templates.

Snowball has a living design system.

12. THE 90-DAY ACTION PLAN — WEEK BY WEEK

WEEK 1-2: FOUNDATION

- [] Secure snowball.design domain
- [] Build Demo Site #1: Dark Precision (Marcello archetype)
- [] Set up Stripe account
- [] Create LinkedIn company page: Snowball Design Intelligence
- [] Send first 50 outreach messages

WEEK 3-4: FIRST REVENUE

- ☐ Follow up on outreach
- ☐ Close first DFY client (\$3K-\$5K)
- ☐ Build Demo Site #2: Italian Elegance (Pininfarina archetype)
- ☐ Start building the component library (Figma)
- ☐ Document every decision made on Demo Sites #1 and #2

WEEK 5-6: SYSTEMS

- ☐ Build Demo Site #3: Transport Clean (PriestmanGoode archetype)
- ☐ Package first template for sale (\$497)
- ☐ Launch Snowball landing page (one-page, clean, dark precision archetype)
- ☐ Send 50 more outreach messages
- ☐ Close second DFY client

WEEK 7-8: ACCELERATION

- ☐ 5 templates available for sale
- ☐ Begin Next.js component library build
- ☐ Reach out to 5 design agencies for white-label conversations
- ☐ Hit \$10K total revenue

WEEK 9-10: PLATFORM BEGINS

- ☐ Begin builder UI wireframes
- ☐ Sanity CMS schema design
- ☐ AI Style Advisor prompt engineering begins
- ☐ Close third DFY client

WEEK 11-12: ALPHA PREP

- ☐ Builder MVP: 2 archetypes, basic brand input, live preview
- ☐ Invite first 5 alpha users (previous DFY clients)
- ☐ Trend scraper pipeline setup (Firecrawl)
- ☐ Hit \$20K total revenue

13. SNOWBALL BRAND IDENTITY — THE PLATFORM'S OWN DESIGN

Snowball's Own Site (Practice What We Preach)

Archetype: Dark Precision (Marcello DNA) — We eat our own cooking.

Hero Headline Options (Test These):

1. "Design that compounds."
2. "Luxury design sites for firms that build extraordinary things."
3. "The intelligence behind the world's best design studios."
4. "Your site should be as good as your work."

Recommended: Option 4. Most direct. Most emotionally resonant.

Subheadline:

"Snowball builds luxury design agency websites modeled on Pininfarina, Zagato, and the world's elite design studios — then makes them smarter every week."

CTA: "See the work" (primary) / "Start a project" (secondary)

Color: Archetype A — Dark Precision

Font: PP Neue Montreal (display) + Cormorant Garamond (body)
